

Planning & Estimating Engineers

Position reference number: SPEE/0322

Location: Weymouth, Dorset

Company: Sumac Precision Engineering Ltd

Due to continued growth, Sumac Precision Engineering is seeking Planning & Estimating Engineers to join our team at our Weymouth facility.

In this key role, you will support customer requirements by analysing technical specifications, developing accurate costings, and contributing to the delivery of high-quality engineered solutions. You will work closely with our Production, Sales, and Engineering teams to provide efficient planning and estimating that aligns with our operational capabilities and customer expectations.

Key Responsibilities:

- Analyse customer drawings and specifications to develop accurate estimates
- Prepare quotations and lead times based on internal capabilities and materials
- Collaborate with Sales, Engineering, and Production teams to support customer proposals
- Interpret and understand technical drawings, GD&T, and machining symbols
- Maintain strong relationships with customers and suppliers
- Support continuous improvement and cost-efficiency in quoting and planning processes

Ideal Candidate:

We are looking for a technically capable team player who understands precision engineering and thrives in a fast-paced environment.

Essential:

- Strong knowledge of machining and manufacturing processes (manual & CNC)
- Ability to interpret complex engineering drawings and specifications
- Excellent written and verbal communication skills
- Confidence working with PCs and business systems
- Ability to work under pressure and manage multiple priorities
- Collaborative mindset and professional integrity

Desirable:

- Proven experience in estimating and/or planning within a precision engineering environment
- Understanding of material and process cost drivers
- Familiarity with ERP/MRP systems
- Exposure to fabrication, welding, or special processes such as plating or coating

Training may be considered for the right candidate with a strong engineering background and the right attitude.

Minimum of 39 hours per week

Core working hours are 8 am to 4 pm Monday to Thursday and 8 am to 1 pm Friday
